Mining Exploration Entity QUARTERLY REPORT 31 MARCH 2018

Dragon Mountain Gold Limited (“DMG” or “the Company”) is pleased to provide this Quarterly Activity Report for the quarter ending 31 March 2018.

Cawes and Avalon Projects

On 11 July 2016, the Company announced that it had signed a Heads of Agreement for the gold and other mineral rights, excluding nickel and cobalt, with Wingstar Investments Pty Ltd, a Company associated with Company chairman, Robert Gardner.

Further details about the project and the HOA are detailed in the announcement of 11 July 2016.

The Company has undertaken significant Due Diligence work over the previous quarters on the Cawse and Avalon projects. Details of the work are outlined in the June Quarterly Activity Report.

The results of the recent drill program continue to be analysed and the results will be announced as soon as the analysis is complete.

The DMG program comprised 3 RC holes for a total of 318 metres. The drill holes targeted the contact between the Cawse Monzogranite and the thick ultramafic sequence of the Walter Williams Formation which hosts the Cawse lateritic nickel orebodies. In the historical records there are multiple gold occurrences for around 20km along the contact between the granite and the ultramafics that host the nickel laterite within the Cawse Project.

All holes were collared in or on top of the lateritised komatiite of the Walter Williams Formation, intersected the contact and continued into the Cawse Monzogranite. Significant gold values were intersected in the two southernmost holes, not at the contact but 10-20m into the Monzogranite.

Further drilling is recommended to test the Monzogranite along the known mineralised trends adjacent to these holes.

Further exploration work is being considered by DMG, which if undertaken would require an extension to the HOA.
